WORK EXPERIENCE

NETCHEX

Software Engineer II | Jul 2021 - Current

- Refactored traditional C# microservice to a CQRS pattern that improved performance due to huge DTOs being used in the old system.
- Lead team of developers to maintain our legacy AngularJS suite, and collaborate with stakeholders to incrementally rewrite legacy.
- Built and maintained with internal team an upgrade for our E-Verify integration in C# to remain in compliance.

NETCHEX

Software Engineer I | Jan 2020 - Jul 2021

- Developed Performance Review tasks with my internal team in a legacy task system built with AngularJS and .Net.
- Collaborated with internal team and stakeholders to implement a Performance Review tracking product using newer technology like React and .Net Core. This product has generated >\$1M in revenue.
- Worked closely with the service department and clients to debug and fix problems in production.

KIKODA

Software Engineer | Jan 2018 - Jan 2020

- Built a Time Tracking CRUD application using .Net Core and Razor that employees could use to track time spent on projects.
- Collaborated with teammates to build RESTful Api with .Net Core to serve data to a React front-end that managed projects and inventory for clients.
- Worked with my team to create features for a .Net Core RESTful Api and a React front-end for The Surplus Line Association of California. That serves as a learning center for thousands of brokers!

EDUCATION

FLORIDA STATE UNIVERSITY

Bachelor of Arts in Computer Science | Aug 2015 - Dec 2017

SKILLS

Languages

Javascript

C#

HTML

CSS

SQL

Frameworks

.Net

.Net Core

React
